

The screenshot displays a patent database interface. On the left is a sidebar with a tree view containing categories like Drafts, Pending, Active, Failed, Saved, Favorites, Tagged (0), UOC, Queue, and Trash. The main window has a top toolbar with buttons for Search, View, Queue, and Print. Below this is a search bar containing the text 'USPAT:US:GRUB:EP:WO:DERWENT:IBM:TOP'. The main content area shows a search result for 'US 5731941 A' with the title 'High performance data tuner for video systems'. The result is displayed in a table with columns for Document ID, Issue Date, Pages, Title, Current DR, Current DR#, Retrieval Classif, and Inventor. The table shows one entry with the following details:

Document ID	Issue Date	Pages	Title	Current DR	Current DR#	Retrieval Classif	Inventor
US 5731941 A	19980324	36	High performance data tuner for video systems	348/463	348/467, 348/473, 348/731		Rosenbaum, Glen V et al.

Below the table is a large, textured area that appears to be a placeholder or a corrupted image. The bottom of the interface includes a status bar with icons for View, Details, HTML, and a page number indicator.
